

Atiqur Rahman

Drone Builder & Pilot | UAV Technician | EASA A1/A3, A2, STS

Oslo, Norway | atiqur.pilot@gmail.com | +47 458 08 855 | atiq.no | [LinkedIn](#) | [GitHub](#) | [Flickr](#)

PROFILE

Drone builder and pilot who started by building drones from scratch before moving into flight operations. 250+ flight hours on small to large platforms, including quadcopters, octocopters and VTOL drones, in VLOS and BVLOS operations. Hands-on experience with drone assembly, flight controller configuration, sensor and payload integration, test flights, troubleshooting and maintenance in Norway and Germany. Currently Pilot in Command and drone operations manager at Altivon AS, with hands-on SORA 2.5 operational planning. Background in computer science and embedded systems. Experienced with field operations and demonstrations.

CERTIFICATIONS

EASA A1/A3 Remote Pilot | EASA A2 Certificate of Competency | EASA STS (Standard Scenarios)

WORK EXPERIENCE

Co-founder & Drone Operations Manager (Pilot in Command)

Apr 2026 – Present

Altivon AS

Oslo, Norway

- Plan and lead UAV operations for building inspection, thermographic surveys and drone-based high-pressure cleaning.
- Responsible for flight and operations planning, fleet maintenance, report handling and pilot training.
- Prepare SORA 2.5-based operational flight plans for operations under the Airwatch LUC; building tooling to automate flight plan production.
- Drive R&D and technical business development for new drone services.

Drone Pilot & Technician

May 2025 – Apr 2026

Beagle Systems

Hamburg, Germany

- Drone operations, maintenance, repair and assembly.
- Engineering activities, UAV system integration and hardware development.
- Test flights, validation and evaluation of new UAV solutions.
- Project planning, coordination and HSE routines.
- UAV fleet operations including scheduling, documentation and compliance reporting.
- Training and onboarding of new colleagues and drone pilots.
- Travel on short notice for client demonstrations and field operations.

Drone R&D (Werkstudent)

Oct 2024 – Mar 2025

TOPseven GmbH

Emden, Germany

- Took part in building drones from scratch; integrated sensors and payloads.
- Configured Pixhawk and CubePilot flight controllers.
- Contributed to a custom Android app for UAV control in Java (MAVSDK).
- Worked with industrial drones, inspection sensors and SITL simulation.
- Programmed microcontrollers.

Network Testing Technician (Summer Student)

Jul 2024 – Sep 2024

Home & Marine

Bremen, Germany

- IT infrastructure onboard the Disney Treasure cruise ship.
- Troubleshooting, configuration and fault analysis.
- Documented technical procedures to support system reliability.

UAV Systems Intern

Nov 2023 – Jun 2024

Robot Aviation

Hønefoss, Norway

- UAV test flights and troubleshooting of aerial systems.

- Configured dual-channel PMDDL and 4G high-bandwidth communication modules.
- Integrated sensors (e.g. FLIR) for inspection missions.
- Built [Flight Logger](#), a web app logging all flight operations, operator activity and flight hours.
- Developed [ConBot](#) to automate ArduPilot SITL environment setup.
- Set up a two-layer cloud system for data storage.

SKILLS

- **Drone building and configuration:** building drones from scratch, assembly and repair, flight controller configuration (Pixhawk, CubePilot), PX4 and ArduPilot setup, sensor and payload integration (FLIR), datalinks (PMDDL, 4G), SITL simulation
- **Drone operations:** VLOS and BVLOS, multirotor and VTOL, operational flight planning, SORA 2.5, flight operations in Norway and Germany
- **Testing and verification:** test flights, verification and validation of UAV systems, evaluation of new UAV solutions, field operations and client demonstrations, test documentation and reporting
- **Maintenance and technical follow-up:** fleet maintenance, preparation of drone systems, repairs, troubleshooting and fault analysis, system integration
- **Flight safety and compliance:** EASA regulations, operations under LUC, SORA risk assessment, HSE routines, compliance reporting, training and onboarding of drone pilots
- **Collaboration:** working with engineering teams, project planning and coordination, travel on short notice
- **Ground control:** Mission Planner, QGroundControl, MAVLink, MAVSDK
- **Embedded:** Raspberry Pi, Arduino, ESP32
- **Software:** C/C++, Python, Java, Bash, Linux

PROJECTS

- **PX4 Simulation Configurator (Beagle Sim):** GUI launcher for PX4 SITL with persistent configuration, real-time log viewer and ULG-to-KML conversion (Python).
- **Transparent MAVLink OSD:** FPV-style telemetry overlay for Ubuntu/QGroundControl, reading MAVLink over UDP (Python).
- **ConBot:** automated setup of ArduPilot SITL environments for UAV development and testing (Bash/Python).
- **Flight Logger:** web app for UAV flight logs, operator activity and flight hours.
- **IoT Home / Arduino:** home monitoring and automation (motion, temperature, gas, flame) with a web UI (C++/Arduino).
- **IoT Weather Station:** ESP8266 + DHT22 web dashboard for temperature and humidity (C++/Arduino).

EDUCATION

M.Sc. Programming & System Architecture (thesis remaining)

University of Oslo

B.Sc. Computer Science & Engineering

University of Development Alternative

VOLUNTARY WORK

- **Founder & President**, Hridoye Bangladesh (400+ member community in Norway)
- **Board Leader (Daglig leder)**, [Kringjå Cricket Club](#), Norges Cricketforbund
- **Freelance Photographer**, technology and landscape ([portfolio](#))
